Alkira Fuel

COMPLETE FUEL SOLUTIONS

www.alkirafuel.com.au

Summary

Alkira Fuel is Australia's first dedicated national Indigenous fuel supply company. Which has been formed by a group of expert-professionals to provide operational fuel solutions for various industry sectors across Australia.

Our professional team provides solutions for your fuel supply, storage, and management needs. We pride ourselves on developing products and solutions that are adaptable, responsive, and flexible meeting the needs of our customers who rely on efficient refueling of vehicles, machinery.

Our mission, exceed our customer's service and compliance expectations by:

- Ensuring full compliance with all applicable legislative and contractual obligations through an open and robust governance system.
- Promoting a flexible and dynamic work culture allowing all stakeholders the freedom to communicate and collaborate on ideas and requests.
- Provide cost-competitive and professional services in a timely manner.

Why work with us?

You are helping to make change happen through socially responsible fuel related procurement. Our commitment is strong in 'closing the gap'. Alkira creates sustainable employment opportunities for indigenous people nationally through our recruiting and mentoring policies internally and throughout our supply chains.

Alkira are actively seeking to provide registered carbon offset options to help clients meet environmental goals. We bring together experienced professionals with fresh ideas who desire to achieve outcomes that tackle Indigenous inequities and climate change through a strengths-based approach.

Alkira provides national bulk fuel deliveries direct to your business on-site tanks anywhere in Australia.

PRODUCTS ALKIRA SUPPLIES

- **Bulk Fuel deliveries up to 100,000 litre's scheduled as required**
- **Aboveground fuel storage tanks**
- **Underground fuel storage tanks**
- **Fuel farm planning and provisioning**
- **Fuel dispensing and pumping equipment**
- **Fuel management systems - remote access reporting**
- **Automatic tank gauging and metering systems**
- **Filtration systems for better fuel quality**
- **Pipework and tank linking kits for facilities**
- **Ancillary equipment such as walkways, handrails**
- **Safety equipment including spill containment control kits**
- **Associated electrical components including automated control**
- **Integrated Fuel Card accounts**
- **Direct site refueling**

Alkira provides fuel solutions to a diverse range of industries including road transport, rail, heavy industry, mining, and civil construction.

Benefits of an Alkira Fuel card account

- Easily alter/modify your cards, order new or additional cards or restrict the type of purchases that can be made on any card.
- Receive one consolidated report regardless of how many cards are issued to each vehicle tailored to your requirements, enabling detailed insight into your fuel expenditure ensuring waste is reduced along with administration costs.
- Issue one card per vehicle or a mix allowing flexibility while taking advantage of the most cost-effective solution.

Our bulk fuel tanks use state of the art 'cloud based' technology to constantly monitor consumption and fuel levels.

BENEFITS OF A FUEL MANAGEMENT SYSTEM (FMS)

NETWORKED COMMUNICATIONS - 3G, WIFI, ETHERNET Networked communications keep your records up to date in Realtime. Your data is always available, and you don't need any special software to access it. USB access on the front of the panel provides access to data if you do not have a communication network.

ELECTRICAL ROBUSTNESS - Designed to deal with unstable power sources, such as generators, truck systems and environments with high levels of electrical noise.

ENHANCED SECURITY - Access to fuel by vehicle and/or driver can be restricted by preselected times (such as 9am to 5pm) and/or volume (such as a maximum of 2,000 litres). EASY TO USE, EASY TO SET UP Configuring the unit is menu based, eliminating the need to enter excessively long codes or numbers.

TOUGH ON THE OUTSIDE - An IP66 rated, powder coated steel enclosure ensures continuous operation in all conditions. Tested temperature range -25 to +55C and microparticle proof rubber seals stop dust, insects, moisture, and water from entering the unit. Multiple gaskets further enhance protection.

SMART ON THE INSIDE - Easy to service the unit with Click-in and Click-out modules. Each is clearly marked and can only fit in one place. No need for special technical or electrical skills.

SMART ACCESS - Near Field Communications for easy user or vehicle identification, with long lasting proximity cards. You also gain flexibility to gain the data you want, and how you want it. Access can also be provided via PIN, iButton key and VIN (Vehicle Identification Number) or RFID FOB's.

CONTROL up to 4 fuel/oil dispensers, all delivering simultaneously.

RECORDS fuel use for up to 2000 vehicles and the past 5000 fuel issues in memory.

TANK GAUGING is integrated giving you a complete fuel management and reporting system in just one unit, to report, record, measure and alert about fuel use and levels. The tank Gauging system can monitor up to four tanks with low / high level alerts being able to be customised for people who require an accurate system for re-ordering and basic stock control.

How do I view the tank levels?

1. The levels are continuously displayed on a dedicated installation screen or can be displayed as required on a combined display, thus eliminating the need to climb ladders to access readings.
2. If the unit is connected to the internet, tank levels can be accessed anytime online.
3. Just send the tank gauging system a blank SMS from your mobile phone and it will reply with an SMS showing the tank levels. Tank levels can also be sent to your mobile phone automatically at a pre-set time of day.
